

KARTHIK EASAM

PROJECT MANAGER | SOFTWARE DELIVERY | AGILE/SCRUM | STAKEHOLDER & RISK MANAGEMENT

Hyderabad, Telangana, India | +91 91607 84194 | easamkarthik@gmail.com | linkedin.com/in/easamkarthik

PROFESSIONAL SUMMARY

Project Manager with 9+ years of experience leading end-to-end delivery of software and business initiatives — from requirements and planning through development, UAT, release, and post-production support. Currently manage a portfolio of **7+ concurrent projects and 9+ client relationships**, owning scope, schedule, resourcing, risk, and stakeholder communication while coordinating **30+ cross-functional team members** across Product, Engineering, QA, UI/UX, Operations, and Finance.

Proven track record delivering platforms end-to-end, including a **six-module ERP system built from the ground up** and a **LegalTech platform taken from concept to launch**. Skilled in **Agile/Scrum delivery, RAID and risk management, escalation handling, and executive-level status reporting**, with direct experience partnering with **US-based stakeholders onsite in Florida and Arizona**.

CORE COMPETENCIES

Project & Delivery Management

- End-to-End Project Management
- Project Planning, Scope & Scheduling
- Budget & Resource Alignment
- RAID / Risk & Issue Management
- Change Request Management
- Release & Implementation Management
- UAT & Go-Live Coordination
- Post-Production Support

Stakeholder & Team Leadership

- Client & Executive Relationship Management
- Cross-Functional Team Leadership (30+)
- Stakeholder & Expectation Management
- Escalation & Issue Resolution
- Vendor & Partner Management
- Executive & Status Reporting
- Agile / Scrum / SDLC
- Process Improvement & Governance

PROFESSIONAL EXPERIENCE

EXECUTIVE MANAGER (PROJECT MANAGEMENT)

RedandBlue Applied Innovations Pvt. Ltd. | Hyderabad | June 2023 – Present

- **Own end-to-end delivery** of 7+ concurrent software and business initiatives, managing scope, schedule, budget alignment, resourcing, and risk from requirements through go-live and post-production support.
- **Serve as primary project and client point of contact** for 9+ stakeholders, driving requirements gathering, expectation management, and escalation resolution to protect delivery commitments and client satisfaction.
- **Lead cross-functional delivery teams of 30+** across Product, Engineering, QA, UI/UX, Operations, and Finance, holding teams accountable to milestones, dependencies, and release timelines.
- **Manage project risk and issues (RAID)** proactively — identifying blockers, dependencies, and scope changes early, and driving mitigation plans through to closure.
- **Own UAT and release management** end-to-end: coordinating business validation, sign-off, defect triage, implementation readiness, and go-live execution.
- **Deliver executive and stakeholder reporting** — status updates, risk/issue trackers, and milestone reports — enabling leadership decision-making across a multi-project portfolio.
- **Manage vendor and partner relationships (30+)**, aligning external dependencies and service delivery with internal project timelines.
- **Drive process improvement and delivery governance**, standardizing project documentation and workflows to improve delivery efficiency and audit readiness.

Software Product Implementation — OfficeGX (Integrated ERP Platform)

Led project delivery coordination for an integrated ERP platform built from scratch, spanning **CRM, Project Management, HRMS, ATS, Sales & Purchasing, and Payroll Automation**.

- **Owned product delivery lifecycle** from ideation and requirements through planning, development, testing, UAT, release, and continuous improvement across six business modules.
- **Translated business requirements into actionable project deliverables**, coordinating Product, Engineering, UI/UX, and QA teams throughout.
- **Tracked delivery against milestones and dependencies** across multiple product modules, resolving blockers to protect timelines.
- **Led UAT validation with business users** and managed defects, change requests, and implementation issues through resolution.
- **Coordinated release readiness and production deployment**, converting user feedback into enhancement priorities.

Software Product Implementation — eLegum (LegalTech Platform)

- **Led delivery of a LegalTech platform** from concept through launch and ongoing enhancement, coordinating Product, Engineering, UI/UX, QA, and Operations.
- **Gathered and prioritized customer requirements**, coordinating workflows for case submission, advocate consultation, appointment booking, payments, and document management.

- **Owned UAT, release readiness, and post-launch improvements**, tracking defects and production issues through resolution.
- **Supported delivery of Lexa**, an AI-powered legal assistant, from development through implementation.

PRODUCT OWNER | QA SOFTWARE TESTER

Radise India Private Limited | Hyderabad & Florida, USA | January 2020 – June 2023

- **Partnered with Business, Engineering, and QA teams** to analyze requirements, identify gaps, and validate software features before implementation.
- **Supported Agile delivery cycles** — sprint planning, backlog grooming, sprint testing, UAT, regression, integration testing, and release validation.
- **Tracked and drove defects to resolution**, coordinating directly with Engineering on issue investigation and fixes.
- **Communicated release readiness and risk status** to stakeholders, supporting production validation and post-release analysis.
- **Selected for onsite assignment in Florida, USA**, collaborating directly with US-based teams and stakeholders.

IoT Product Ownership — Civil Engineering & Geotechnical Monitoring Platforms

Owned/managed four IoT and digital infrastructure products built from scratch, spanning embedded sensors, hardware, wireless connectivity, mobile applications, cloud platforms, analytics, automated reporting, and real-time monitoring across construction and geotechnical domains.

- **SmartPile® Inspector / Duplex** — Owned development of an IoT-enabled pile-driving and integrity monitoring solution using audio and embedded sensors for real-time data capture, blow counting, driving-stress monitoring, and automated reporting. Managed product requirements, roadmap, cross-functional delivery, testing, and field deployment across hardware, software, cloud, and engineering teams.
- **SmartPile® EDC** — Managed an embedded structural sensing solution collecting strain, temperature, and load-related data from piles and concrete structures. Coordinated sensor, wireless communication, data acquisition, and software integration for real-time structural monitoring and analysis.
- **SmartWaterMonitor** — Owned an IoT-based water-level and pressure monitoring solution integrating sensors, cellular connectivity, cloud data management, alerts, and remote monitoring. Managed product requirements, integrations, testing, and deployment for dams, embankments, seepage, and geotechnical monitoring applications.
- **SmartFieldSheet / SmartDensity** — Managed a mobile field-data collection and reporting solution that wirelessly captured density-gauge data and streamlined QA/QC approvals, report generation, and client submission. Led product requirements, workflow digitization, testing, and field implementation to replace manual field sheets, data entry, and reporting processes.

QUALITY ANALYST

SuAi, Inc. | Hyderabad | April 2019 – October 2019

- **Identified process, quality, and delivery gaps** through operational analysis, coordinating corrective actions with internal stakeholders.
- **Delivered management reporting and performance metrics** to support process improvement and standardization.

PROCESS DEVELOPER

Genpact India Private Limited | Hyderabad & Arizona, USA | August 2016 – February 2019

- **Managed a 25-member team** delivering daily customer operations, handling 200+ customer interactions daily while maintaining quality and service standards.
- **Monitored KPIs, productivity, and service-level performance**, managing escalations and coordinating resolution with internal stakeholders.
- **Led process transitions, training, and operational implementation**, identifying bottlenecks and driving improvement initiatives.
- **Selected for onsite assignment in Arizona, USA**, collaborating with US-based teams and stakeholders.

KEY HIGHLIGHTS

- **9+ years** of experience across project management, software delivery, QA, and business operations.
- Currently managing **7+ concurrent projects** and **9+ client relationships**.
- Lead cross-functional delivery teams of **30+ members** and coordinate **30+ vendors/partners**.
- Delivered a **six-module ERP platform** from the ground up and a **LegalTech platform** from concept to launch.
- Strong track record in **RAID/risk management, UAT ownership, release management, and post-production support**.
- International delivery experience with **US-based stakeholders onsite in Florida and Arizona**.
